

# BIG ALCOHOL FACTORY SEIZED

## Fully Equipped Still And Thousands of Gallons of Mash Taken Near Frankfort

Cook County's notorious "Alcohol Ring" has invaded Will County and Friday night a full fledged still capable of turning out a million dollars worth of booze a year was seized by State Attorney H. Rehn of Will County on the farm tenanted by John Waldvogel, 3 miles east of Frankfort on the Lincoln Highway.

Michael Csarow and Agoytino Dittol were arrested and brought to the county jail at Joliet by Deputies Wiles and Ferguson. Csarow is from Chicago Heights and is believed to have been the manager of the plant. Dittol who gave St. Louis as his residence, declared he had nothing to do with the operation of the distillery but was employed as a coppersmith.

The size of the plant and completeness of its equipment indicates that one of the Chicago-Chicago Heights alcohol rings was behind the venture is the opinion of State's Attorney Rehn.

### EQUIPMENT VALUABLE

It is estimated that the equipment alone has a value of \$20,000 to \$25,000. The operators are believed to have commenced setting up the vats and other apparatus about five weeks ago but they had not begun actual distillation.

The stills and rectifiers were complete but had not yet been put to use when the state's attorney raided the place. If it had run for a year its operators would have done approximately a million dollars worth of business.

The present price for bootleg alcohol runs between \$5 and \$6 a gallon. If the output was 500 gallons a day that would mean \$2500 for every 24 hours the plant was in operation.

Just who is the owner of the farm is a question that a number of attorneys have been arguing for sometime. John Waldvogel lives on the place and at one time had a contract to buy it but did not carry it thru, he said, because of a cloud on the title. Waldvogel declared that he did not know anything about the distillery that was located in an old cow barn about 400 yards south of his house. According to State's Attorney Rehn there are several persons who are said to have an interest in the farm property including four Chicagans, Leonard Jenukowski, Mathias Bingen, Charles Ravendoff and William G. Ruel.

The barn in which the stills were located stands about three-eighths of a mile south of the Lincoln highway. The structure is about 100 ft. long and 50 ft. wide.

### FIND 23 VATS

Twenty-three vats of approximately 3000 gallons each had been set up there and that the operators expected to be making alcohol with in the next few days or week was indicated by the fact that every vat was filled to the brim with a liquid mash.

Corn sugar was the base for the mash. From the number of empty sugar sacks hung over supports above each vat it is estimated that at least 23 tons of sugar had been used. Corn sugar bought by the car load runs \$2.70 a cwt.

The vats were all new as was the other equipment, which included 2 100 gallon stills, three 60 gallon stills, two 50 gallon rectifiers (in which the alcohol is cleared and rectified) and a dozen or more two-inch coils.

Apparently all of the equipment including the vats, was built at the plant. A gasoline engine was used to pump water in filling the vats.

All of the copper, the gasoline engine and several hundred feet of hose were loaded on a truck and brought to Joliet. As soon as the State's attorney gets the necessary court order this equipment will be junked and sold.

### DESTROY MASH

The mash was destroyed by the

simple expedient of boring holes in the bottoms of the vats. Sixty-nine thousand gallons of mash were turned into Hickory creek which is but a short distance from the barn, and with all the vats flowing it sounded like a waterfall.

The men engaged in boring the vats were dizzy when they emerged from the barn because of the fumes rising from the escaping liquor. So strong were these fumes that they caused the eyes and throat to smart and produced tears and coughing.

Deputy Gilbert Knater of Frankfort was commissioned to watch the place and later break up the vats.

State's Attorney Rehn was returning to Joliet from Benton Harbor when he seized the distillery. He had received a tip that a brewery or alcohol plant was being operated near Frankfort and he learned its exact location.

Driving up to the farm house the state's attorney met Waldvogel and told him that he was looking over the farm and wished to examine the buildings. He then strolled out to the barns and pushing open the doors of a old cow stable found a full-grown distilling plant.

Finding Csarow and Dittol the state's attorney placed them under arrest and telephoned to the county jail to request that deputies be sent out. Until the deputies arrived Rehn guarded the prisoners and the distillery. Edward G. Powers, investigator for the state's attorney, took over the work of checking and loading the equipment seized.

Charged with manufacturing and possessing intoxicating liquor, Mike Csarow and Agoytino Dittol, arrested Friday night by State's Attorney Rehn, pleaded guilty on those counts when arraigned before Judge Fred R. Adams, and each was fined \$1,000 and costs.

The court also ordered the equipment of the distillery destroyed. The 23 vats in which mash was stored, are to be dismantled and broken up so they cannot be used again for that purpose.

It is understood that this is the second time a still has been found on this farm within the past six months. It is said the first raid was conducted by Chicago raiders and only a small still was found, but the matter was hushed up and very few people knew that such a raid was conducted, but when the news of Friday night's raid broke, it came as a surprise to many and to others, it came as something to be expected. Frankfort township has figured in two sensational booze raids within the past two years.

The first big surprise came when an underground brewery was found in full operation in the old wine cellar north of Frankfort. After the place was siezed, no more was heard about the affair. It is said that most of the equipment was stolen from the place, presumably by the owners, who undoubtedly set up in business again somewhere else.

A peculiar thing noticeable in both cases is that no real owners of the property on which the illicit stills were seized could be found. Everyone appears to be ignorant of what has been going on and all who know anything lie and keep their mouths shut for fear of getting a bullet in the head if they tell what they know.

A mere fine is nothing to these birds. A good long term at hard labor in the pen or else being shot down, when they flash any guns would put a stop to this kind of work. Instead of selling the equipment it should be utterly destroyed so it could not fall back into the hands of these crooks again. It will be noticed that all of these stills are run by foreign crooks who nine times out of ten are not even citizens of the United States. Such crooks when caught ought to be

## Cows Inbibe of Mash and Die

Two are dead and three were made violently ill as a result of drinking the mash found in the alcohol distilling plant seized by State's Attorney H. Rehn last Friday night near Frankfort.

The case is one for a veterinary rather than the coroner as the victims were members of the dairy herd owned by Albert H. Krusemark, local attorney and Frankfort farm owner.

Krusemark's farm is located near the property on which the distillery was found. Krusemark's cattle are turned out to pasture on that farm. Saturday night part of the pasture was covered with the mash that had been dumped from the vats. Some of the mash stood in pools, and the cattle probably thinking it was only a new odor that had come to live in Hickory creek, quaffed deeply of the mixture.

Two died within half an hour and three others were made very drunk and ill but they were saved. The money raised thru the sale of the distillery's equipment probably will be used to compensate Krusemark for his loss.

## Fred C. Mau of Mokena is Dead

Fred C. Mau, aged 48 years died Wednesday noon at the home of his father Carl Mau in Mokena, following an illness of six years duration. Following the death of his wife, formerly Emma Munger, Mr. Mau was cared for by his brother Emil and his wife. Mr. Mau was totally blind at the time of his demise and suffered greatly from a nervous disease. At one time he was associated with J. G. Oswald in the mason contracting business.

He is survived by his father Carl Mau, three brothers, Charles, Emil and Martin, four sisters, Mrs. Henry Lorenz, Mrs. Fred Kurtz, Mrs. Wm. Lorenz and Mrs. Emil Medendorff.

Funeral services will be held at 1:30 p. m., Saturday from the late home to the St. John Evangelical church at 2 o'clock, Rev. W. J. Cramer officiating. Burial in St. John cemetery south of Mokena.

## Greater Tinley Park Celebration Sat.

This coming Saturday night there will be a big time in Tinley Park when the firemen stage a big celebration in honor of the arrival of their new fire truck. A big parade is scheduled in which the new fire truck will be the center of attraction. The new apparatus was purchased this spring at a cost of over \$4,000 and is the only one of its kind in this section outside of the city of Hinsdale. The outfit consists of a Reo truck on which is mounted a Perch fire fighting apparatus consisting of chemical tanks, hose, ladders, pump, etc.

The truck is so equipped that the pump can be connected with the village water mains so that water can be pumped direct from the water mains at the rate of 400 gallons per minute. In case of a fire out of the village limits the same pump can be placed in well or cistern and will pump water same as from the village water mains.

Following the parade there will be a big dance at the Linden Garden. Everyone is invited to these festivities. A good time is promised for all at this "Greater Tinley Park Day" celebration. Tinley Park is to be congratulated on her progressive civic spirit.

### SALE GOING BIG

The big closing out sale now on at the B. Balchowsky & Sons store at Frankfort is drawing big crowds. Thousands of bargains are on sale. Read further particulars in adv. on back page.

deported forthwith. They have no respect for our laws and are only after the dollar.

## Joliet Merchants Exposition To Be Opened on July 19

The Merchants and Manufacturers Exposition which will hold forth for six days commencing Monday July 19, will occupy an unique position in the annals of commercial and industrial activity inasmuch as it will be the fourth Exposition of Progress Show to be given in Joliet, in an ideal portable canvass building especially constructed for that purpose, centrally located with ample floor space for the proper exhibition of the varied products to be shown.

The Exposition officials are working along community and co-operative lines and are trying to make it cumulative, constructive and instructive, besides providing an amusement program that will be surprisingly good and clean.

Several innovations in Exposition features is promised and it is hoped that the Exposition will be a barometer of business, where the enterprising local manufacturers, jobbers and dealers will demonstrate their faith in the future of Joliet and its trade radius.

"Enjoy Golden Days and Silver Nights" is the watch word and the Exposition and funfest will be first and foremost, proudly progressing and illustrating business strength and the part this city plays in supplying this section with useful things rightly priced. "It will be an Exposition that will cling to the memory and set life aglow with new impulses".

Exhibit space is going rapidly and every available booth will be filled is the prediction of the space committee. With high class vaudeville, beautiful fireworks, free the Exposition and amusement center will pay a thousand percent dividend on joy stock with a bit of bonus in smiles and laughs, it will be the stupendous surprise show of Joliet worth coming miles to see.

## Frankfort Man Explains Work of Illinois Aid Society

Wesley Hollstein of Frankfort who has been connected with the Illinois Children's Home and Aid Society for a number of years, is again placing children from this home with people in this section. He has placed ten or more worthy children in homes at Monee and Crete and some around Frankfort. Following is a short statement by Mr. Hollstein regarding the work:

"It is the purpose of the Illinois Children's Home and Aid Society to interest the citizens of the state of Illinois in the welfare of neglected children in the State; to carry on educational propaganda and to develop group organizations for community service in their behalf; to render constructive aid service to children in need; to care for neglected and dependent children and to operate receiving homes or other institutions for the specialized care of its wards.

Statistics show that there are enough dependent and homeless children to bring joy and happiness into each childless home. We are in special need of permanent free homes, permanent boarding homes and temporary homes for the summer." Anyone desiring to render such constructive service may do so by getting in touch with Mr. W. R. Hollstein of Frankfort, Ill., or by communicating with the main office at 308 North Michigan Avenue, Chicago, Ill.

Mr. Hollstein has been connected with the above named society a number of years and has found a number of homes for children.

### DANCE AT MOKENA JULY 24

A dance will be held at the Mokena pavilion Saturday night July 24. Bob Pierce orchestra.

## Overheated Brooder Sets Fire

Mokena's new fire siren was used for the first time in case of an actual fire Monday morning about 9:30 o'clock when the alarm was sounded. A fire had broken out on the J. V. Hall farm quarter of a mile north of Mokena in a chicken house caused by an overheated brooder. A large crowd quickly arrived and the blaze was put out before it could spread to adjoining buildings. The fire was noticed by neighbors. The Hall family was not at home at the time.

### SURVEY FOR HIGHWAY

Surveyors are at work on the route of the new Southwest highway. They have been working at Alpine the past week.

## SUSPECT-CAR ROBBERS

When Oscar Klose, Sr., went to open the Bechstein elevator Wednesday morning he discovered that the terrace on the east side of the building was badly cut up by the wheels of a heavily loaded truck. The feed shed also showed signs of having been hit by a car and an oil cup broken off from a Ford truck was found on the roadway near the feed shed. Upon examination it was found that nothing had been taken from the elevator or the feed shed, so it was suspected that perhaps some loaded cars standing on a nearby siding might have been robbed. The Rock Island rail road was notified and a detective has been assigned to make an investigation.

## NOTICE!

TO WHOM IT MAY CONCERN

I, Mrs. Evelyn Moore, wish to correct a few false and harmful statements that have been rumored about town concerning the accident I figured in on June 29th, 1926.

I at no time was in custody of the police in Chicago or in Mokena.

I did not run away but on the other hand, took the little boy to the hospital and did all in my power to save the little boy's life.

Mr. Frisch at no time had a warrant for my arrest. He was advised to notify me when the inquest was to be held.

The Coroner's Jury exonerated me, the verdict being accident unavoidable.

I hope in the future statements will not be made until the truth is verified so things will not be complicated as have been in a case like this.

## Will County to Vote On Forest Preserve

Will County voters will be asked to vote on the proposition of creating a Forest Preserve at the November election. The woodlands of Will County are fast disappearing and nothing is done it will be only a matter of a few years before there will not be any timber land left at all. The Joliet Rotary Club has been agitating the Forest Preserve plan as a means of conserving Will County's woodlands and the plan is meeting with popular approval throughout the County and the News-Bulletin heartily endorses the plan and urges the voters of the county to be sure and vote "yes" on the Forest Preserve proposition at the November election.

The News-Bulletin will print articles from time to time showing the benefits of a Forest Preserve.

Let us all be boosters for the Forest Preserve plan.

## Swipes Chickens;

### Pays Hush Money

A very sensational story has just leaked out in Frankfort that a certain man was caught in the act of stealing chickens by two brothers, owners of the chickens. In order to hush things up it is reported Mr. Chicken Swiper paid over \$30 to one of the brothers but failed to pay the other brother with the result that he spilled the beans and the story got out.

## Honor Bride To Be

Last Thursday evening Mrs. Gilbert Hurley entertained a large number of friends in the home of Miss Christiana Schmidt at a miscellaneous shower in honor of Miss Lillian Schmidt and her approaching marriage to Mr. Lloyd Warning of New Lenox.

The home was beautifully decorated in pink and white streamers and ferns. The affair was a surprise on the honored guest.

Bunco was the diversion of the evening and prizes won were presented to the bride elect.

A small wagon and basket, decorated in pink and white was drawn into the living room by the two small nieces of the bride elect, Lorain and Loretta Schmidt, twins of Joliet. They bore the many beautiful gifts.

Refreshments were served and all present enjoyed the evening.

## Geology School Tours Country by Railway

The geology department of Princeton university has just started a traveling school on a tour of the country in a specially designed pullman car, to study the geology and natural resources of North America. The twenty-two pupils and instructors in the party will travel about 10,000 miles in two months, and will then be examined at Princeton. Dr. Richard M. Field is in charge. This is a view in the classroom car.

## Carrying Former Emperor of Korea to His Tomb

This view of the funeral procession of Prince Yi, former emperor of Korea, shows the catafalque being carried to the mausoleum between lines of mourners dressed in white, the mourning color of the Orient.

## The Barrel in Teenie Weenie Land

Here is the unique summer home presented by admirers of the Teenie Weenies to Mary Dickerson Donahey, wife of William Donahey, creator of the Teenie Weenies. So far as known, this is the largest pickle barrel ever constructed. It is 16 feet high, with a capacity of 21,000 gallons. There is a living room downstairs, with sleeping room upstairs. The barrel in the rear is made into a kitchen. The small room is 9 feet in diameter, while the living room is 12 feet. "The Barrel" is located on Grand Sable lake, near Grand Marais, Mich. School children from Grand Marais, dressed in Teenie Weenie costumes, conducted the presentation ceremonies.

## New Supreme Dictator of the Moose

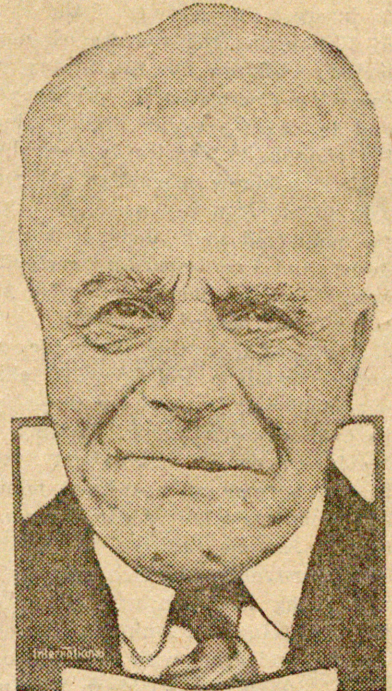

At its convention in Chicago the Loyal Order of Moose elected Norman G. Heyd of Toronto, Canada, as supreme dictator, and named Philadelphia for the next convention. Mr. Heyd is shown above, at right, with J. Albert Cassedy, his predecessor in the office.

"That's easy. Just watch my operations and do exactly the opposite."

SUMMER AFTERNOON GOWNS;  
NEW LINGERIE IS COLORFUL

EVERY once or twice in a while—and much oftener now than in the good old days of yore—a real artist in clothes appears and shows us what can be done with prevailing modes. It takes an artist to select those style notes, that, when they are put together, will produce a perfect harmony. Among the many details that add interest to styles, he knows which he may use, where to begin and where to leave off, when he assembles a new model, and how to give it a touch or so of his own.

An afternoon gown that sums up the modes of today with consummate skill, is pictured here. It is made of

color range runs through peach, green, tea rose, lavender and yellow and a feature of the season is the combination of two colors in one garment.

In fabrics crepe de chine continues to hold the lead in silks and fine, firmly woven voile in cottons, but other thin silks are well represented and voile has rivals in fine batiste and nainsook. Undergarments reach the limit of sheerness in georgette and voile, which are used in both plain and printed varieties and afford a chance for the generous use of platings. Voile is a sturdy material and even georgette is less fragile than it looks. Besides the sheer beauty of

Smart Afternoon Gown.

flat crepe, in the color called June rose, and has a vest and lower sleeve sections of white georgette with a graceful jabot to break the severity of simple lines. Plaited godets, pointed at the neckline, are inserted in the front, back and sides of the skirt. The straight collar is extended into long ties—and these ends are the end of a story as delightful as any told by the season's modes. This model is adapted to any of the fashionable soft fabrics in plain colors.

Very flattering afternoon gowns are naturally also very popular. These are georgette or chiffon models in flowered patterns, worn over crepe de chine slips. They do not need elaboration, since the fabrics themselves are so decorative, but they are made interesting and varied by little details of finish, as flared apron fronts,

these fabrics, the fact that they may be easily retinted, if tubbing causes them to fade, makes a strong appeal to women.

In handmade, tailored lingerie of crepe de chine, and colored floral motifs in dainty designs are embroidered at the top of chemise and gowns. Light colors are used in these embroideries and narrow ribbons for shoulder straps while triple straps are popular in the very narrow ribbons. Tucks and plaits are introduced in these tailored garments which are nearly always pale pink in color. Some white is shown in new models having applique designs in color embroidered in white, and white garments with pipings in a color are among the newest items.

In lace-trimmed lingerie, filet, val, alencon and net are used in edgings,

A Dainty Undergarment.

jabots, scarf collars, cuff tabs, tiered skirts, vestees and cape attachments. Reversing the order of printed chiffon over plain slips, are gowns of printed silk veiled with long tunics of plain chiffon or georgette. Both plain and printed patterns in sheer fabrics are made up with delicate lace flouncings, and black lace, over black or flesh-colored foundations, is featured among the gossamer gowns for summer afternoons.

Daintiness in design, delicate colors and sheerness of fabrics, are characteristics of lingerie, whatever the type or style it belongs to this season. Color is the factor of outstanding importance, it seems, since all-white has been supplanted in popular favor by pastel shades in silk and in sheer fine cotton materials. Beginning with pale pink the

inserts and medallions. The more elaborate gowns have lace yokes extended into semi-sleeves over the shoulders, lace pockets and lace hemlines and are made of crepe de chine. Chemises of this material or of voile or georgette are shown with long molded bodices and short plaited skirts. Lace banding finishes the top and bottom and joins the bodice and skirt. Along with the return of handmade lingerie comes the high-necked and long-sleeved gown once more. These are made of cambrie and nainsook for the most part, but crepe de chine and albatross are also used and much attention is given to graceful designing and to the use of net, filet and Irish lace in their decoration.

## Lamps Hurry Crops

Four crops of wheat can be raised on a single piece of ground in one year with the aid of electric light. This remarkable fact has been established after exhaustive experiments in the application of light to plant growth in England. Easter lilies and daffodils over which 1,000-watt lamps were suspended grew from bud to bloom in four days. Ordinarily this growth takes four weeks. Six hours, from midnight on, are the most effective of the twenty-four for plant stimulation by electric light.

## ORGANIZATIONS AND MOTHERS BOTH AGREE

### Health of School Girls Important

The Girl Scouts and Camp Fire Girls are two national organizations, working side by side in the cause of healthy, happy, intelligent womanhood; training the minds of eager girls for greater service, training their bodies for the destiny that shall be theirs.

All honor to them! Wise mothers like Mrs. Alice Louthan urge their daughters in their early teens to take Lydia E. Pinkham's Vegetable Compound.

Mrs. Louthan says—"I gave my fifteen-year old girl Lydia E. Pinkham's Vegetable Compound, and it did her a wonderful lot of good. She was out of school for four months. I read the advertisement of the Vegetable Compound, and since she has taken it she has improved and has gone back to school. I recommend the Vegetable Compound to other mothers with girls who are not as strong as they should be."

Mrs. ALICE LOUTHAN, Route 2, Charleston, Illinois.

Some girls in the fourth generation are now relying on Lydia E. Pinkham's Vegetable Compound.

### Record Rotor Ship

The largest rotor ship ever constructed, the Barbara, was recently launched in Germany. It is 300 feet long, 43 feet wide amidships and has a displacement of 2,800 tons. The vessel is expected to average ten miles an hour.

## ORCHARD GLEANINGS

### FIND CULTIVATION BEST IN ORCHARD

Most orchards should be cultivated during the early part of the season, and a cover crop, preferably a legume, should be sowed in the early fall, according to the New York agricultural experiment station. This practice is claimed to have decided advantages over the sod mulch system, at least for most districts of the state.

The station, in tests extending over ten years, secured an average yield per acre of 69.16 barrels of apples from an orchard left in sod. A yield of 116.8 barrels per acre was obtained from an orchard cultivated during the same period. The cultivated trees made a decidedly better growth than the ones in sod.

The beneficial effects from cultivation are believed to result from the saving in soil moisture and to the lack of competition between the trees and the sod for moisture and plant food. Also insects and diseases are more readily kept under control in the cultivated orchard than in the sod orchards, due to the protection afforded by the sod during the winter.

The station recognizes, however, that on soils that are rocky or which are so hilly that cultivation would be difficult it may be impracticable to cultivate. Furthermore, hilly land may wash badly if cultivation is practiced. It must also be recognized that cultivation is somewhat expensive on hilly and rocky land. In view of such conditions, it may be advisable, in the opinion of station experts, to practice sod cultivation in some orchards on hilly or rocky land. On most apple soils, however, the station believes that tillage will prove more profitable than sod culture.

While the station's recommendations pertain particularly to conditions in New York, the recommendations will prove applicable in many other states, particularly in eastern and northeastern fruit sections.

### Anthracnose Disease Is

#### Enemy of Raspberries

One of the common enemies of a full raspberry crop is anthracnose disease. It is quite prevalent, and, together with crown gall, has discouraged many from attempting to raise cane fruit. It is detected by a spotty appearance of the canes, and these places are centers of infection. Proper spraying helps to control anthracnose. For the first spray use liquid lime-sulphur, 10 gallons in 100 gallons of water. The commercial liquid lime-sulphur recommended is about 33 degrees Baume, and dilutions of this strength test should be used. For the next spray Bordeaux mixture is recommended, at the rate of 4-8-100, which means 4 pounds copper sulphate, 8 pounds stone or lump lime to 100 gallons of water. The use of lime-sulphur at the second spray is not recommended. Black raspberries require spraying every season, but reds are not so susceptible to anthracnose.

### Horticultural Hints

Give the waste land a chance to earn its way by growing trees.

The fifth orchard spray should be made about two weeks after the fourth spray.

Do not neglect the orchards because a part or all of the fruit may have been destroyed. It is Mother Nature's provision that plants shall have a rest occasionally.

Apple scab test plots in Cuyahoga county, Ohio, this year showed a control 95 per cent efficient where the spraying was thorough. In unsprayed plots scab infected 65 per cent of the crop.

Clean up black knot in plum and cherry orchards by removing the knotted twigs and branches, and then get rid of them by burning. Lime-sulphur spray also helps prevent infection in clean trees.

Apple and other trees injured by rabbits or mice should receive treatment as soon as noticed. Where the damage is slight the bark should be smoothed down and the injured portion covered with grafting wax.

The earlier that fruit and ornamental trees of all kinds are planted after the ground is dry enough to dig, the more successful will the planting be. The same applies to bush fruits, strawberries and other herbaceous perennials.

The codling moth, on leaving the apple, spins a little cocoon in which it passes the winter. The apple maggot immediately disappears in the ground, with no cocoon, until late June or early July of the following year.

Time is short for effective spraying of fruit trees which are infested with scale. This infection is so difficult to eradicate that it requires a strong spray which would kill the tree if applied during the active growing season.

## Alfalfa Helpful in Any Rotation

### Results Given of Experiments in Production of Various Crops.

(Prepared by the United States Department of Agriculture.)

Alfalfa in a rotation generally has a more beneficial effect than manure on a following crop of potatoes or oats, according to experimental results obtained over a period of eleven years testing at the Huntley experimental station in the Yellowstone valley of Montana. The increase in yield of potatoes due to manuring was 34.1 bushels per acre, while that in favor of alfalfa was 43.5 bushels for the eleven-year period. The average increase in yield of oats due to alfalfa in the rotation was 12.2 bushels, as compared with an increase of 4.4 bushels effected by manuring.

#### Results in Circular.

A full discussion of the results of these trials is contained in Department Circular 369-C, just published by the United States Department of Agriculture, which also gives a complete account of the experimental work done there during the year to render assistance to local farmers in solving some of their agricultural problems.

Experiments are conducted at the station in the production and utilization of crops of local importance on both irrigated and dry land. Some of those discussed in this report are the work done on corn, sugar beets, potatoes, fruit trees, ornamental trees and shrubs, and small fruits.

Though corn has been a crop of only minor importance on the Huntley reclamation project, it has increased to some extent in recent years, says the report. With the development and selection of early-maturing varieties it would appear that this crop might be grown to advantage in a limited way, especially for such purposes as pasturing or for silage.

#### Capacity of Pastures.

Tests with dairy cattle to determine the carrying capacity of pastures top-dressed with manure as compared to untreated pastures showed that top-dressed pastures were better by 20 per cent.

Hogs pastured on corn and rape produced pork at the rate of 772 pounds per acre, or 45 pounds more pork per acre than when pastured on corn alone.

A copy of the circular may be secured, as long as the supply lasts, by writing to the United States Department of Agriculture, Washington, D. C.

### Survey of Dairy Farms

#### Shows Management Needs

The price at which milk is sold and the efficiency with which it is produced very largely determine the profit from a dairy, the Department of Agriculture points out, following a survey of 422 farms in southeastern Pennsylvania.

Even where no better market is available, says the report, many dairymen can raise the average price they receive by producing a larger proportion of the milk during the winter season, and by closer attention to cleanliness. The greatest changes can be made in lowering the feed cost.

"Efficient cows, comfortably housed, and intelligently fed and cared for, constitute the most important essential to profitable dairy farming. Improving the quality of the cows, paying more attention to feeding each cow just the right quantity of feed, and better balancing of rations are the important ways by which a farmer can increase the efficiency of his dairy."

Detailed results of the survey have been published in Department Bulletin No. 1400-D, "Factors Affecting Farmers' Earnings in Southeastern Pennsylvania." Copies of the bulletin may be obtained free, as long as the supply lasts, upon request to the Department of Agriculture, Washington, D. C.

## FARM NOTES

Fertilizer saved is money saved.

As a catch crop, feterita has proved its worth and place among Kansas sorghums.

Dry, unleached wood ashes furnish potash to the soil and benefit it in other ways.

The rugged, stretchy, growthy, fast-growing, heavy boned, deep bodied, big-type hog is best for pork production purposes.

A combination of lime and sulphur dusted over cucumbers, melons and squashes every ten days steers the bugs elsewhere effectively. It is easy to prepare and handle. Use hydrated lime.

Oats contain such a high percentage of fiber that if they are to be fed in quantities whole, they should at least be soaked. Cooking in addition to the soaking adds to the ease with which the fiber can be digested.

The United States Department of Agriculture is making a special study of the most effective way to rid the country of the fly pest. The experiments and investigations are being carried on at the government dairy farm in Maryland.

## THE WORLD'S GREAT EVENTS

ALBERT PAYSON TERHUNE

(© by Dodd, Mead & Company.)

### Pyrrhus

PYRRHUS, ruler of the Greek Kingdom of Epirus, hit on a plan, more daring than original. Born in 318 B. C., only five years after the death of his cousin, Alexander the Great, and while the latter's fame was fresh in the memory of living men, Pyrrhus resolved to follow Alexander's example and conquer the world. Unluckily for his success, he decided to work westward instead of east.

Now, from earliest days, power and progress have always rolled westward, and it has seldom gone well with the Easterner who has tried to check them. Pyrrhus did not realize this, but was destined to learn it.

Greece had for centuries been the foremost barrier of civilization against barbarism; of democracy against despotism. But of late a newer power had sprung up in the western world. This power was first the city and afterwards the state of Rome. Rome originally was a small town covering but one or two of the seven hills over which it afterwards spread. It was at first ruled by kings who were elected by the people. Then, when these kings waxed tyrannical, the people deposed them and formed a republic that endured for 250 years. The little city grew, conquering all its neighbors and becoming at last the virtual mistress of Italy. In after years it was to rule the whole world. Already, brute strength, subtlety and mental superiority were making its name famous. Greece, on the other hand, had passed the acme of her "Golden Age," and, thanks to luxury and civic dissensions, was on the wane.

It was in 280 B. C. that these two mighty powers of the civilized world first clashed, and that clash did much to mold the future trend of the earth's destiny. For Pyrrhus began his real attempt at universal conquest by crossing the Adriatic and declaring war on Rome. He did this on the pretense of helping the Greek cities in southern Italy that resented Roman rule. With 28,000 men and a herd of trained war elephants Pyrrhus began his march against Rome. The sight of an elephant was unknown in Italy, and the great beasts' presence struck mortal terror everywhere. The people were paralyzed with fear.

Rome summoned all her soldiery and vassals and met Pyrrhus at Heraclea, near the Gulf of Tarentum. It was a furious battle, and the Italians fought gallantly in defense of their land. But the elephants unnerved them and stamped their horses. Their close ranks could not withstand the irresistible charges of the maddened Asiatic brutes. Rome's army was at length forced to retreat. But Pyrrhus' forces were so shattered and crippled by the battle that they could not pursue their advantage. They had won a victory that was costlier than a defeat. The term, "a Pyrrhic victory," used in designating some worse than barren triumph, had its rise from this incident.

The following year Pyrrhus again met and defeated the Roman legions at Asculum, but was once more so weakened by the conflict that he derived no gain from it. He fell back on Sicily, a Greek province, and there so offended by his ideas of despotism the people's love for liberty that he lost all chance of aid from them. In 276 B. C. he again invaded Italy, but by this time Rome was prepared against his coming. At a battle near Beneventum he was utterly routed and retreated to Epirus. He never again attempted to conquer Rome.

His dream of world empire had been a fizzle, simply because it was civilization and not barbarism that he had attacked. A beaten barbarian is a panic-stricken creature, ready to fawn and grovel before his conqueror. An educated, civilized nation is never wholly beaten.

Alexander, by the very fame of his deeds, struck terror to the hearts of the Persians. The fame and armies of Pyrrhus, backed by the war elephants (creatures as terrible and unusual of aspect to the Italians of old as the dinosaur would be to modern men) could only temporarily baffle the Roman republic. Where there is a true republic there must be thought. Where there is thought there can be no real or permanent defeat.

Pyrrhus, a year or so after his retreat, was killed in a street fight in Argos, a woman dropping a roof tile on his head from a window as he was slaying her son. To die at the hand of a woman was in those days the direst possible disgrace for a warrior. So, for centuries thereafter, the fate of Pyrrhus was pointed out as a warning to would-be world conquerors.

Alexander, living at an earlier day and having all conditions in his favor, had for the time made himself master of the known world. But he had not attacked a foe more civilized than himself. He had momentarily bound the destiny of the earth to his whim. But at his death the bonds had flown asunder. From time to time in history some one man has risen above his fellows, dominated them and bent them to his will. But only momentarily.

There can be no One Man or One Nation rule. The only permanent ruler, as all history shows in countless instances, is the free Will of the People.

### The Picnic

Find the spot, and with the poet say, "Here let us feast." Monarch Cocoa, made fresh at the roadside fire, or carried hot or iced in a thermos bottle, adds a touch of completeness to the picnic repast.

### Wise Division of Time

#### Made by Elevator Man

Whether the daily ups and downs of an elevator have a peculiar effect on the elevator operator or not is a question for a scientist. William Winlock, colored elevator man at the Federal building, has developed a philosophy of life which, he avers, he adheres to strictly. The trait of character Winlock has is worth cultivating, anyway.

Billy, as he is called, never meddles in the affairs of others, although he always is courteous and willing to do anything he can to accommodate the passengers who ride in his car. "You know what I have learned," he said the other day. "There are fifty-two weeks in a year. Twenty-six of those fifty-two weeks I mind my own business. And the other twenty-six I let other people's business alone."—Indianapolis News.

### Cuticura Soothes Itching Scalp.

On retiring gently rub spots of dandruff and itching with Cuticura Ointment. Next morning shampoo with Cuticura Soap and hot water. Make them your everyday toilet preparations and have a clear skin and soft, white hands.—Advertisement.

### Irish to Mint Coins

Ireland is to mint her own coins for the first time in a hundred years. The law assimilating Ireland's currency with that of England was passed in 1825, but the Free State parliament recently decided to establish a token silver, nickel and copper coinage for amounts up to 40 shillings (about \$10). Eminent artists have been asked to assist the government in the designs of the new coins. The first Irish coins were struck by the Danish kings of Dublin in the Tenth or Eleventh century, and in medieval times there were mints in Dublin, Waterford, Tuam and Drogheda.

### Sad Connoisseur

"This is a very rare book."

"Yes, too bad it is so old, isn't it?"

Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep.

To avoid imitations, always look for the signature of *Dr. J. C. Fletcher*. Absolutely Harmless—No Opiates. Physicians everywhere recommend it.

## PALOS PARK

### THE UNITED STATES POSTAL SERVICE

Many of us, including the writer, have been so ignorant of the workings of the United States Postal Service, that a summary of the talk given by Mr. Edward Cowan before the Palos Woman's Club may be of interest.

The work of the Post Office department is carried on by four groups of men: the postal clerks, the city carriers, the railway mail and the rural carriers. The work of these departments overlaps almost not at all.

The income of the Post Office year before last was three hundred and fifty millions of dollars. Despite this large income, each fiscal year is finished with a deficit, which would not be the case, says Mr. Cowan, were it not for the free mail service rendered to other unrelated government departments. Eight hundred and fifty-five thousand letters alone, are handled daily by the postal employees and two hundred and fifty thousand money orders are issued daily.

There are four classes of post offices, first, second, third and fourth class; the class being determined by the amount of outgoing postage cancelled by the post office. The Palos Post office is fourth class although last year it came within one hundred and five dollars of becoming a third class office. Mrs. Ada Schmidt has been postmistress of the Palos postoffice for about 19 years. The amount of the incoming mail has no relation to the class of post office. For example, Mr. Cowan may carry a ton of parcel post packages a month, from mail order houses in Chicago, but the credit for these goes to the Chicago post offices, not to Palos office.

The first postal service was established in the Massachusetts colony in 1633, this service being rendered by a private company. In 1707 postal service was organized throughout all the colonies.

After the Revolutionary War, Benjamin Franklin was functional in organizing the postal service as a government department, and it has continued under the government's auspices ever since. The postal

rates were at one time three cents (for the first three hundred miles and ten cents for any distance beyond that.) At first it was one of the duties of the mail carrier to collect when he delivered a letter one or two cents to pay himself for his trouble, this being in addition to the regular postal charge for stamps.

In 1863 city delivery was instituted and about 1900 rural service was begun. The average rural route is about twenty-five miles, and is still considered a horse-cart route, despite the fact that about sixty per cent of the carriers use automobiles. To use machines, it is necessary for the carriers to get special permission of the government. An attempt has been made to regulate the service so that the rural carrier might have a regulation eight-hour day, but as routes which can be covered in four hours in the summer, may take eight or more hours in the winter, it has been found impossible to arrange this eight-hour day.

You have all probably seen the U.S. Mail cars and marvelled at the expertness of the mail clerks, who, surrounded by mail bags, so accurately and rapidly tossed letters and cards into the proper bags. These railroad clerks represent the cream of the service, says Mr. Cowan. They must keep in mind not only some two thousand post offices, but must also know all the railroad junctions and times of the trains passing those junctions, so that they may throw off the mail to reach its destination in the shortest possible time. These men must take an examination every three months, and in order to pass these examinations, they must spend at least eight hours a week in study, outside their regular working hours. But a very small percentage of error is allowed, four errors in a thousand being the limit.

The post office inspectors are also a group of men of rare ability. While in other departments of the service promotion depends upon civil service examinations, in this department, it is necessary also to pass an examination, but promotion depends largely upon a man's record. I noticed in the last issue of the News-Bulletin, this

head line: "Sentence Mail Bandit and Alleged Slayer of Walter Fisher." That is the work of the Postal Inspectors. When a robbery or any other irregularity takes place, each post office inspector is given an envelope of papers concerning the details of the robbery and any available clues. That case remains on the inspector's files until the robber is either acquitted or convicted. And the percentage of convictions is amazingly large, New York City securing 96 per cent convictions, and Chicago 93 per cent. This high per cent of convictions is probably the explanation for the safety of the U.S. Mails, and the respect in which the mails are held. Mr. Cowan says that for years his patrons have made it a custom to leave money in their mail boxes, which they wish him to issue into money orders, and never has a single cent disappeared. There is a very high sense of honesty among the post office employees, petty thefts being almost unknown.

There is too, a keen desire among postal employees, especially among the rural carriers, to be of real service to their patrons. Their services just begin with the carrying of the mail. And our carrier, Mr. Cowan, is a real influence and power in the district which he serves, not alone in Postal affairs, but in all things pertaining to the community.

One improvement which Mr. Cowan desires on his R.F.D. route, is that all the mail boxes and posts be painted white. Many people build beautiful homes, and then stick up along the highway in a most conspicuous place, rusty tin cans, which they call mail boxes. Surely the United States Postal Service is deserving of more respect than that. The Post Office has recognized the desirability of better boxes, and puts on an honor list and route in which the boxes all meet the specifications in good appearance.

MAY THE PALOS R.F.D. SOON BE ADDED TO THAT LIST.

—Edith Bradley Wells.

# This recipe won

## Sour Cream Drop Cakes

$\frac{2}{3}$  cup sugar  
1 teaspoon butter (creamed)  
1 or 2 well-beaten eggs  
 $\frac{2}{3}$  cup sour cream  
1 cup flour  
 $\frac{1}{2}$  teaspoon soda  
1 teaspoon baking powder  
1 teaspoon vanilla

Cream butter and sugar. Add soda to one tablespoon of hot water. Add to sour cream. Sift dry ingredients. Add sour cream to creamed butter and sugar. Add dry ingredients and mix well. Bake at 350° temperature. This recipe makes  $1\frac{1}{2}$  dozen cup cakes.

## in Radio Recipe Contest of Home Service Department

The above recipe was selected by the judges as the most unusual, economical and appetizing of all the 2500 recipes submitted in the recent Radio Recipe Contest conducted by the Home Service Department of the Public Service Company of Northern Illinois.

Mrs. Eva Hawkins Shanks, Director of the Home Service Department, will broadcast this and the other prize-winning recipes over Station WORD in the near future and will also tell about plans for a second Radio Recipe Contest to be held this fall.

Tune in on the weekly Home Service Talks, Station WORD (wave length 275) each Tuesday afternoon at 3 o'clock, daylight saving time.

## We Must Work Together

EVERY thoughtful citizen of this community is interested in its development and progress. There's no question about that! We all want our children to enjoy better homes, better schools, better parks—more agreeable surroundings and greater comforts.

We all want our town to keep step with its neighbors, to take the lead in civic affairs. So there is only one sound plan for us to follow:

*We must work together to increase the wealth of this community by doing everything we can to encourage local business.*

When you and your family patronize our advertisers—the stores and banks of our town—and keep your money in circulation right here at home, there is no power on earth that can prevent our progress.

*Read the Ads in this Paper and save yourself money by trading at home*

## FRANKFORT

Mr. and Mrs. Edward Warning had their little son christened last Sunday morning at the St. Peter Evangelical church. The name given was Dale Edward. The sponsors were Mr. and Mrs. Henry Breidert Rev. G. S. Gerhold officiated.

David Balchowsky, son of Mr. and Mrs. Balchowsky, is attending the Chicago Law School.

Mr. and Mrs. Will Folkers and Mr. and Mrs. John Staff left Wednesday on a fishing trip and vacation trip to Minnesota.

Mr. and Mrs. Arthur Eisenbrandt have rented Mrs. Peter Pfeifer's house and will move in this week.

Mrs. James Hunter entertained the Ladies Aid of the M. E. church at her country home last Thursday.

Mr. and Mrs. Wm. Genens and Mr. and Mrs. Martin Hick of Blue Island have motored to Denver, Colorado to visit relatives.

Mrs. John Stauffenberg of Green Garden entertained the Ladies Aid of the Manhattan church at her home Thursday afternoon.

Mr. and Mrs. Manson LaHue had as their guests on the 4th of July Mr. and Mrs. Roland Watson and Edmund LaHue of Urbana, Ill. Burton Breidert, son of Mr. and Mrs. Henry Breidert is ill with an infection of both feet.

The St. Peter's church congregation will build a new parsonage this summer on the east side of the church. Henry Breidert has the job as carpenter, Walter Baumgartner, mason, Otto Herschbach, plumbing and hardware. It will be a nine room house.

Charles Pfeifer and son Harold of Cavanaugh, Indiana, spent Thursday at home. Mr. Pfeifer is foreman of the extra gang on the E. J. & E. rail road.

Chas. Pfeifer, Ed. Haake and William Kampe attended the Ashlar Band rehearsal Thursday evening at Chicago Heights. They attend the rehearsals every Thursday evening.

Mrs. Frank Cheney was surprised on her 44th birthday last Saturday evening by her relatives and friends. Cards were played at 4 tables. Prizes were awarded to Mrs. Edward Harms of Chicago Heights, Mrs. Fink of Frankfort, Mrs. Fisher of St. George, Mr. Ed-

ward Harms of Chicago Heights, Henry Umland of Chicago Heights and Clarence Umland of Matteson. Supper was served. The guests enjoyed a real time and wish Mrs. Cheney many more such birthdays.

The Frankfort Four H. Sewing Club met Tuesday afternoon at the school assembly room. The following program was given:

Care of Hair, Marie Scheer; Care of Nails, Laura Dittich; Care of Skin, Viola Rehberg; Care of Teeth, Elizabeth Owen; Material suitable for dress, Eva Jean Pfaff; Color in dress, Evelyn Pfeifer; Games and songs. The next meeting will be July 27th.

St. Peter Evangelical church and Sunday school will have their annual picnic July 25th in Borman's Grove. Sunday school will be held that Sunday at 9 o'clock at the Grove and church services at 10 o'clock. Everybody is requested to bring their dinner. Supper will be served by the Sunday School and Bible class.

Miss Viola Lankenau entertained the Amite Sewing circle at her home Tuesday evening.

Mrs. Peter Folkers who has been very ill is improving.

Charles Schroeder of Chicago Heights spent the week end with his father-in-law, Chas. Brookman.

Mr. and Mrs. John Bobzin entertained in their home at dinner last Sunday the following guests: Mr. and Mrs. Chas. Bobzin and family, Mr. and Mrs. Frank Bobzin, Mr. and Mrs. Ervin Warning and son, Geo. Bobzin, Rev. G.S. Gerhold, Wm. Minger and Henry Hossbach.

Mr. and Mrs. Chas. Bobzin and sons attended the funeral of their aunt, Mrs. Henry Eggers, held in Joliet last Saturday. Burial was in Mokena cemetery.

Mr. and Mrs. Ernest Pfeifer and family spent Sunday at Homewood with Mr. and Mrs. Peter Pfeifer.

Mr. and Mrs. Geo. Mundt of Manhattan held a family gathering last Sunday at their home in honor of Mrs. Mundt's birthday. The guests were: Mr. and Mrs. Henry Haake, Mr. and Mrs. Chas. Genens Jr. and daughter, Mr. and Mrs. Ferdinand Haake and daughters, Mr. and Mrs. Lester Vander-Boegh and daughter.

Don't forget the Home Improvement club picnic which will be held at New Lenox next Tuesday July 20th. All the Improvement

clubs of Will County will be there Mr. and Mrs. Edward Haake expect to move to Homewood next month where Mr. Haake is employed.

Mrs. Chas Pfeifer visited Kenneth Warning at Silver Cross hospital last Friday.

Mrs. W. V. Hedges returned home Saturday from Fairbault, Minn., where she spent several weeks with the doctor's relatives.

Mr. and Mrs. Gilbert Schmuhl and daughters spent Sunday afternoon with the former's aunt, Mrs. John Krohn in Joliet.

Mr. and Mrs. Shiferstein of Chicago spent Sunday at the Albert Baumgartner home.

Next Sunday morning the Rev. G. S. Gerhold of Champaign will be installed as pastor of St. Peter church, Rev. Irion of Elmhurst will officiate. Services will begin at 10 o'clock. In the evening a reception and supper will be held in the church parlors. Sunday school will be at 9 o'clock.

Miss Gusta Baumgartner is spending a week at the home of her parents, Mr. and Mrs. Albert Baumgartner.

Rev. Gerhold and family are moving here this week from Champaign.

The storm of Monday night struck a large tree near Sippel's store, the electric light wires were struck twice near Wm. Kampe place.

## PALOS PARK

Professor Martin Sprengling, president of the Palos Improvement Club, is spending four months in southern Europe and Asia Minor, working on a piece of research concerning very old Persian folk lore. Dr. Sprengling is Professor of Oriental Languages in the University of Chicago.

Mrs. S. Y. Patterson is studying at the University of Chicago this summer.

Mrs. Jordan of Los Angeles is visiting Mr. and Mrs. A. H. Schweizer.

Twenty-six Palos residents attended the performance of the "Trouble Chasers" in Tinley Park, Friday evening.

Mr. and Mrs. Woods have moved to Palos Park. They are living in Mrs. Rankin's cottage.

We'll expect to see Mr. Morgenthau and Mr. Kotba under the 'big top', as Ringling Brothers are giving complimentary tickets to their circus to store keepers displaying their posters.

A big wooden 'hand' sign board on one hundred and eleventh St., points to the Palos Hills 'Nature's Masterpiece'. It will not be long before we consider every foot of our Palos property a jewel.

Ellen and Kate Schultz have each had a week's vacation in Chicago.

The Palos Boy Scout troop left Monday morning for a two weeks camping trip to Whitehall, Mich. We are proud of our Scouts.

## MOKENA

The Misses Alma Dath, Esther Hellmuth, Inez Roberts of Mokena and Elsa Werner, New Lenox took a boat trip to St. Joseph and Benton Harbor, Michigan Sunday where they spent the day at the House of David and Silver Beach.

Mr. Wm. Abbe has purchased a new Dodge touring car.

Mr. and Mrs. John Balaz have returned from a motor trip to Wisconsin and other points.

Mr. and Mrs. Albert Braun have gone to Mauston, Wis., to visit relatives.

Mrs. Henry Schiek who has been ill for a few weeks is slowly improving.

Miss Elsie Lehmann of Chicago spent the week end at the home of Mr. and Mrs. Chas. Dath on Marti Street. On Monday Mrs. J. P. Hensen, Mr. and Mrs. W. A. Jensen and daughter Shirley and Mrs. Helen Kilian of Humboldt Park were guests at this home.

The Ladies Aid of the M.E. church held a Lawn Social on the lawn of Mrs. Florence Hamilton Tuesday evening. In spite of the cool weather, a good crowd was out. The Tonn Orchestra was present and furnished splendid music thru out the evening.

Miss Alice Horrace entertained a number of her school friends at her home Wednesday afternoon. The event being her 10th birthday. A very good time was had and refreshments were served.

### CARD OF THANKS

We wish to thank the Mokena Fire Department and all who assisted, for the prompt and efficient way in which they fought and controlled the fire on our farm, last Monday morning.

Mr. and Mrs. J. V. Hall.

## WORTH

### VILLAGE HALL FIRST: W. W. PALMER

"A village hall would soon pay for itself," says W. W. Palmer. "As it is now we rent a room for village board meetings and police court purposes, and when a dance is given we are obliged to rent a hall in this or some other village. There is no place to hold law breakers, and village authorities are put to considerable inconvenience when arrests are made. Construct a combination village hall and jail about 100 by 50 feet and all these troubles will vanish. Outsiders could rent the hall for dance, entertainment, and other purposes, bringing in a steady revenue; board meetings and the regular weekly speeders court could be held, and a small space for cells could be set aside."

"It would be in demand for political meetings and for church entertainments that require more room than the church basement affords. There's no question about it. A village hall is needed more than any thing else."

### Children's Playground Is Sadly Needed Says Mrs. Jennie Martin

"When small children are allowed to roam over the tracks, climb freight cars and throw stones at signal lights, there is something decidedly wrong," says Mrs. Martin the Wabash Railway agent and from her post of duty she has a good chance to observe all these things. She has often taken the trouble to get the kiddies off the tracks, and started homeward when they were in imminent danger. She asks no thanks for all this, and seldom receives any, but she feels that a recreational center would help considerably.

"If something is not done to keep the children away from the tracks there will be a tragedy sooner or later," "It is a vital matter" she declares. She speaks feelingly and her words carry conviction. When lives are endangered all other issues pale into insignificance.

### RENEWAL OF REAL ESTATE BOOM

The past week has brought a revival of interest in the real estate boom in the community. Mr. Mickleberry of the Mickleberry Savings Company has been making a number of purchases in the community recently. He purchased Mr. Rust's five acres on Harlem Ave., for the sum of \$20,000, also Mr. H. Leipstropp's property of 2 1/2 acres for \$12,000 and Mr. C. Tobey's 80 acres for \$1500 per acre.

Mr. Rolfe also reports that he has been offered over \$3,000 for his place on Harlem Ave., which he purchased for \$1000 about four months ago.

The Biedenkopf farm which sold for about \$650 per acre the first of the year, is now being held for \$3000 an acre, but it is reported that this property is to be subdivided.

From these reports we can realize that we have not reached the peak of the boom and from information that is to come out soon we are just entering upon one of the greatest real estate booms in the history of this section.

### LOCALS

Mr. Louis Lange has been ill for sometime and for a while it was thought an operation would be necessary.

Mayor Wood's beehive is still in a flourishing condition.

Mrs. L. J. Beidenkopf who has been ill is slightly improved.

The young people of Worth have been busy serenading the newlyweds namely, Mr. and Mrs. Louis Zuidema and Mr. and Mrs. Frank Cure. This is the way one of the members of the bunch describes it: "We gathered up all the old tin cans, visiting the various junk piles of Worth and with this equipment proceeded to the brides' homes making as much noise as possible enroute, but horrors! the little 'brats' beat us to it, and the bridal couples were not at all surprised. However, the girls had the extreme pleasure of kissing the grooms, while the boys had the honorable privilege of bestowing a kiss on the beautiful brides."

Mrs. Henry Stewart has been seriously ill, but is now on the road to recovery.

### CHURCH IMPROVEMENTS

The community spirit of Worth manifested itself again recently when the members of the fire department and men of the village spent the evening improving the church grounds.

The historic old shed that has weathered so many winters, but

### Happiness

Half the world is on the wrong scent in the pursuit of happiness. They think it consists in having and getting and in being served by others. It consists in giving and in serving others.—Henry Drummond.

### Term of Opprobrium

The term Yankee, according to Bombaugh, is not Indian, but Dutch, and means to snarl and quarrel. It was applied by the burghers of New Amsterdam to the invaders from Connecticut.

### Sahara Once Fertile?

Arabian tradition is that water was still abundant when the Arabs first entered the Sahara in the Seventh century, and that the drying-up process was not completed until the Thirteenth century.

## WARY BEAVER

Synopsis.—Part wolf, part dog—when two months old Baree has his first meeting with an enemy, Papayuchisew (young owl). Fighting hard, the antagonists are suddenly plunged into a swollen creek. Badly buffeted, and half drowned, Baree is finally flung on the bank, but the water has destroyed his sense of direction and he is lost, lonely and hungry. For many days his life is one of fear and distress. He meets various creatures of the wild and goes through a thunderstorm. He is learning more and more. He strays into the trapping grounds of Pierrot and Nepeese. Nepeese wounds Baree with a rifle, but he escapes.

## Chapter II—Continued

The wings made a great tumult about Baree, but they did not hurt him. He buried his fangs deeper. His snarls rose more fiercely as he got the taste of Oohoomisew's blood, and through him there surged more hotly the desire to kill this monster of the night, as though in the death of this creature he had the opportunity of avenging himself for all the hurts and hardships that had befallen him since he lost his mother.

Oohoomisew had never felt a great fear until now. The lynx had snapped at him but once—and was gone, leaving him crippled. But the lynx had not snarled in that wolfish way, and it had not hung on. A thousand and one nights Oohoomisew had listened to the wolf-howls. Instinct had told him what it meant. He had seen the packs pass swiftly through the night, and always when they passed he had kept in the deepest shadows. To him, as for all other wild things, the wolf-howls stood for death. But until now, with Baree's fangs buried in his leg, he had never sensed fully the wolf-fear. It had taken it years to enter into his slow, stupid head—but now that it was there, it possessed him as no other thing had ever possessed him in all his life.

Suddenly Oohoomisew ceased his beating and launched himself upward. Like huge fans his powerful wings churned the air, and Baree felt himself lifted suddenly from the earth. Still he held on—and in a moment both bird and beast fell back with a thud.

Oohoomisew tried again. This time he was more successful, and he rose fully six feet into the air with Baree. They fell again. A third time the old owl fought to wing himself free of Baree's grip; and then, exhausted, he lay with his giant wings outspread, hissing and cracking his bill.

Under those wings Baree's mind worked with the swift instincts of the killer. Suddenly he changed his hold, burying his fangs into the under part of Oohoomisew's body. They sank into three inches of feathers. Swift as Baree had been, Oohoomisew was equally swift to take advantage of his opportunity. In an instant he had swooped upward. There was a jerk, a rending of feathers from flesh—and Baree was alone on the field of battle.

Baree had not killed, but he had conquered. His first great day—or night—had come. The world was filled with a new promise for him, as vast as the night itself. And after a moment he sat back on his haunches, sniffing the air for his beaten enemy; and then, as if defying the feathered monster to come back and fight to the end, he pointed his sharp little muzzle to the stars and sent forth his first babyish wolf-howl into the night.

## Chapter III

Baree's fight with Oohoomisew was good medicine for him. It not only gave him great confidence in himself, but it also cleared the fever of ugliness from his blood. He no longer snarled and snarled at things as he went on through the night.

His wound was much less painful the next day, and by nightfall he scarcely had noticed it at all. Since his almost tragic end at the hands of Nepeese, he had been traveling in a general northeasterly direction, following instinctively the run of the waterways; but his progress had been slow, and when darkness came again he was not more than eight or ten miles from the hole into which he had fallen after the Willow had shot him.

All sounds now held a meaning for Baree. Swiftly he was coming into his knowledge of the wilderness. His eyes gleamed; his blood thrilled. For many minutes at a time he scarcely moved. But of all the sounds that came to him, the wolf-cry thrilled him most. Again and again he listened to it. At times it was far away, so far that it was like a whisper, dying away almost before it reached him; and then again it would come to him full-throated, hot with the breath of the chase, calling him to the red thrill of the hunt, to the wild orgy of torn flesh and running blood—calling, calling, calling. That was it, calling him to his own kin, to the bone of his bone and the flesh of his flesh—to the wild, fierce hunting packs of his mother's tribe! It was Gray Wolf's voice seeking him in the night—Gray Wolf's blood inviting him to the Brotherhood of the Pack.

Baree trembled as he listened. In his throat he whined softly. He edged to the sheer face of a rock. He wanted to go; nature was urging him to go. But the call of the wild was struggling against odds; for in him

was the dog, with its generations of subdued and sleeping instincts—and all that night the dog in him kept Baree to the top of his rock.

Next morning Baree found many crawfish along the creek, and he feasted on their succulent flesh until he felt that he would never be hungry again. Nothing had tasted quite so good since he had eaten the partridge of which he had robbed Sekoosew the ermine.

In the middle of the afternoon Baree came into a part of the forest that was very quiet and very peaceful. The creek had deepened. In places its banks swept out until they formed small ponds. Twice he made considerable detours to get around these ponds. He traveled very quietly, listening and watching. Not since the ill-fated day he had left the old windfall had he felt quite so much at home as now. It seemed to him that at last he was treading country which he knew, and where he would find friends. Perhaps this was another miracle mystery of instinct—of nature. For he was in old Beaver-tooth's domain. It was here that his father and mother had hunted in the days before he was born. It was not far from here that Kazan and Beaver-tooth had fought that mighty duel under water, from which Kazan had escaped with his life without another breath to lose.

The forest grew deeper. It was wonderful. There was no undergrowth, and traveling under the trees was like being in a vast, mystery-filled cavern through the roof of which the light of day broke softly, brightened here and there by golden splashes of the sun. For a mile Baree made his way quietly through this forest. He saw nothing

I Know How to Play.

but a few winged flittings of birds; there was almost no sound. Then he came to a still larger pond. Around this pond there was a thick growth of alders and willows; the larger trees had thinned out. He saw the glimmer of afternoon sunlight on the water—and then, all at once, he heard life.

There had been few changes in Beaver-tooth's colony since the days of his feud with Kazan and the others. Old Beaver-tooth was still older. He was fatter. He slept a great deal, and perhaps he was less cautious. He was dozing on the great mud-and-brushwood dam of which he had been engineer in chief, when Baree came out softly on a high bank thirty or forty feet away. So noiseless had Baree been that none of the beavers had seen or heard him. He squatted himself flat on his belly, hidden behind a tuft of grass, and with eager interest watched every movement. Beaver-tooth was rousing himself. He stood on his short legs for a moment; then he tilted himself up on his broad, flat tail like a soldier at attention, and with a sudden whistle dived into the pond with a great splash.

In another moment it seemed to Baree that the pond was alive with beavers. Heads and bodies appeared and disappeared, rushing this way and that through the water in a manner that amazed and puzzled him. It was the colony's evening frolic. Tails hit the water like flat boards. Odd whistlings rose above the splashing—and then as suddenly as it had begun, the play came to an end. There were probably twenty beavers, not counting the young, and as if guided by a common signal—something which Baree had not heard—they became so quiet that hardly a sound could be heard in the pond. A few of them sank under the water and disappeared entirely, but most of them Baree could watch as they drew themselves out on shore.

The beavers lost no time in getting at their labor, and Baree watched and listened without so much as rustling a blade of the grass in which he was concealed. He was trying to understand. He was striving to place these curious and comfortable-looking creatures in his knowledge of things. And then, close under him—not more than ten feet from where he lay—he saw something that almost gave voice to the puppyish longing for companionship that was in him.

Down there, on a clean strip of the shore that rose out of the soft mud of the pond, waddled fat little Umisk and

three of his playmates. Umisk was just about Baree's age, perhaps a week or two younger. But he was fully as heavy, and almost as wide as he was long. Nature can produce no four-footed creature that is more lovable than a baby beaver, unless it is a baby bear; and Umisk would have taken first prize at any beaver baby show in the world. His three companions were a bit smaller. They came waddling from behind a low willow, making queer little chuckling noises, their little flat tails dragging like tiny sledges behind them. They were fat and furry, and mighty friendly-looking to Baree, and his heart beat a sudden, swift pit-a-pat of joy.

But Baree did not move. He scarcely breathed. And then, suddenly, Umisk turned on one of his playmates and bowled him over. Instantly the other two were on Umisk, and the four little beavers rolled over and over, kicking with their short feet and spitting with their tails, and all the time emitting soft little squeaking cries. Baree knew that it was not fight, but frolic. He rose up on his feet. He forgot where he was—forgot everything in the world but those playing, furry balls. For the moment all the hard training nature had been giving him was lost. He was no longer a fighter, no longer a hunter, no longer a seeker after food. He was a puppy, and in him there rose a desire that was greater than hunger. He wanted to go down there with Umisk and his little chums and roll and play. He wanted to tell them, if such a thing were possible, that he had lost his mother and his home, and that he had been having a mighty hard time of it, and that he would like to stay with them and their mothers and fathers if they didn't care.

In his throat there came the least bit of a whine. It was so low that Umisk and his playmates did not hear it. They were tremendously busy. Softly Baree took his first step toward them, and then another—and at last he stood on the narrow strip of shore within half a dozen feet of them. His sharp little ears were pitched forward, and he was wiggling his tail as fast as he could, and every muscle in his body was trembling in anticipation. It was then that Umisk saw him, and his fat little body became suddenly as motionless as a stone.

"Hello!" said Baree, wiggling his whole body and talking as plainly as a human tongue could talk. "Do you care if I play with you?"

Umisk made no response. His three playmates now had their eyes on Baree. They didn't make a move. They looked stunned. Four pairs of staring, wondering eyes were fixed on the stranger.

Baree made another effort. He groveled on his forelegs, while his tail and hindlegs continued to wiggle, and with a sniff he grabbed a bit of stick between his teeth.

"Come on—let me in," he urged. "I know how to play!"

He tossed the stick in the air as if to prove what he was saying, and gave a little yip.

Umisk and his brothers were like dummies. And then, of a sudden, some one saw Baree. It was a big beaver swimming down the pond with a sapling timber for the new pond that was under way. Instantly he loosed his hold and faced the shore. And then, like the report of a rifle, there came the crack of his big flat tail on the water—the beaver's signal of danger that on a quiet night can be heard half a mile away.

"Danger," it warned. "Danger—danger—danger!"

Scarcely had the signal gone forth when tails were cracking in all directions—in the pond, in the hidden canals, in the thick willows and alders. To Umisk and his companions they said:

"Run for your lives!"

Baree stood rigid and motionless now. In amazement he watched the four little beavers plunge into the pond and disappear. He heard the sounds of other and heavier bodies striking the water. And then there followed a strange and disquieting silence. Softly Baree whined, and his whine was almost a sobbing cry. Why had Umisk and his little mates run away from him? A great loneliness swept over him—a loneliness greater even than that of his first night away from his mother. He had not found comradeship. And his heart was very sad.

Poor Baree! Even the playful little beaver are afraid of him!

(TO BE CONTINUED.)

## Plants and Animals

From the study of plants we learn how to grow them more efficiently and make the fullest use of plant products; also, because life in plants and animals is similar, if not identical, and as plants lend themselves in some ways more readily than do animals to such observations, any information we can obtain on how plants "work" will almost certainly throw some light on similar functions in animals and human beings.

## Methodist Pioneer

The first Methodist preacher in America was Philip Embury, who had been in the Irish Methodist conference before coming to this country in 1766. He found a number of Irish Methodists in New York city and gathered them into a small congregation that held its meetings in his house.

### Lesson for July 18

#### THE CALL OF MOSES

LESSON TEXT—Exodus 3:1; 4:12.  
GOLDEN TEXT—Certainly I will be with thee.—Ex. 3:12.

PRIMARY TOPIC—Moses at the Burning Bush.

JUNIOR TOPIC—Moses, the Shepherd.

INTERMEDIATE AND SENIOR TOPIC—Facing a Great Opportunity.

I. The Lord Speaks to Moses From the Burning Bush (3:1-6).

It was while keeping the flock of his father-in-law in the desert that the Lord appeared to Moses in the vision of the burning bush. Moses stepped aside to behold this strange sight and was taught the essential lesson of the proper approach to God. The Lord did not leave him long in suspense. He told him that He was the God of his fathers, the covenant God. As soon as he knew that it was God that was speaking to him, he hid his face.

II. Moses' Commission as the Deliverer of His People (3:7-10).

Observe:

1. God's active interest in His people (v. 7).

In a preamble of this commission God declared:

(1) "I have seen the affliction of my people." So keenly conscious is God of all that goes on in the world that not one of His chosen ones can be touched without His notice.

(2) "I have heard their cries." We sometimes feel that God does not hear, but no cry ever goes up from the heart of His covenant child unheard.

(3) "I know their sorrows."

Many indeed are the sorrows of God's children. They are so diverse, but He knows all about them and will adapt himself in grace to their need.

2. God's gracious obligation to His people (vv. 8, 9).

(1) To deliver them out of the hand of the Egyptians.

(2) "To bring them up out of the land."

(3) "To bring them into a good land and large—unto a land flowing with milk and honey."

3. God's commission to Moses (v. 10).

"Come now, therefore, and I will send thee unto Pharaoh that thou mayest bring forth my people, the children of Israel out of Egypt."

III. Moses' Objections Patiently Heard and Removed (3:11-4:10).

1. His personal unworthiness (v. 11).

He said, "Who am I that I should go unto Pharaoh?" He realized his insufficiency for this task. Moses did not refuse to go, but laid his difficulty before the Lord. God answered this difficulty by assuring him that He would be with him.

2. The difficulty of the people to understand Moses' relationship to God (vv. 13, 14).

Moses knew how unwilling they were to acknowledge him as their deliverer forty years before. Since God changes his name as he assumes a new relationship to his people, Moses inquired as to what that new relationship would be and his corresponding name. The Lord promptly met this difficulty by showing a name differing in many respects from all others previously given. This new name is "I am." This name is from the Hebrew "to be." It indicates:

1. God's self-existence. It sets forth the idea that God is the self-existent one and the source of all existence. There is no existence apart from Him.

(2) His self-sufficiency. He said, "I am that I am." God is the unique one. He is not dependent upon any other existence.

(3) His unchangeableness. "I am that I am" may be expanded to mean, I am what I always was. What I always was and am I always will be. The "I AM" of this passage is the Jesus Christ of the New Testament. Therefore the apostle could say, "Jesus Christ the same yesterday, today and forever."

3. Unbelief on the part of the people (4:1).

This difficulty the Lord met by supplying him with credentials which could not be gainsaid. He was given the power to perform supernatural wonders (4:2).

4. Lack of eloquence (4:10).

He confessed that he was slow of speech and of a slow tongue. His ability to speak had not been improved by the Lord's message to him. The Lord's reply (v. 11) carried a real rebuke. He assured him that the God who had made man's mouth could give man the ability to use it. This difficulty the Lord in His infinite patience met by providing an assistant in the person of his brother Aaron.

### The Truth

Next to the Crucifixion of the Lord Jesus Christ there is no truth that you and I need more to lay hold of than the truth of the living Christ—alive today, and personally present with all who trust in Him.—C. A. R. Janvier.

### Need of Prayer

Deeper than the need of men, deeper than the need of money, aye, deeper down within this spiritless life of ours is the need of world-wide prevailing prayer.—Robert E. Speer.

## FIRST to have a proving ground

Three years ago General Motors purchased an 1125-acre tract, 40 miles from Detroit and accessible to all its car and truck divisions.

This was transformed into a great Proving Ground, with every kind of road and grade over which an automobile is called upon to travel.

Here the collective experience and brains of the whole General Motors family are brought to bear upon the problems of each member; and here each make of General Motors car must prove itself against the best that American or European genius has developed.

The Proving Ground marks a forward step in the guarantee of motor car satisfaction. It is your final assurance that you are investing when you buy a General Motors car.

## GENERAL MOTORS

CHEVROLET · PONTIAC · OLDSMOBILE  
OAKLAND · BUICK · CADILLAC  
GMC TRUCKS  
YELLOW CABS, BUSES AND TRUCKS

"A car for every purse and purpose"

### Sacred Cow Influence

His exalted highness, the nizam, has now issued an order by beat of drum at Aurangabad, in British India, that hereafter it will be considered criminal to keep the photograph or picture of a cow within the nizam's territory, that within 13 days from the date of the order all such photographs should be surrendered in the courts of the nizam and that after that date any person found in possession of photograph or picture of a cow will be liable to a fine of 500 rupees (about \$160) and six months' imprisonment.

### The Lesson of Sorrow

By sorrow men learn that they need to be fed with higher food; that they must rest on stronger supports; that they must have other friends and friendships; that they must live another life; that there must be something that neither time, nor chance, nor accident can undermine and sweep away. When men have learned the interior lesson of sorrow, they look upon the trouble not as being less troublesome than it was, but as, from the higher point to which they have risen, unreal and dreamy.—Henry Ward Beecher.

## Flies and mosquitoes love campers

WHY allow these aggravating, filthy pests to ruin your outings? In camp or at home Flit will free you from the nuisance.

Flit spray clears your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use.

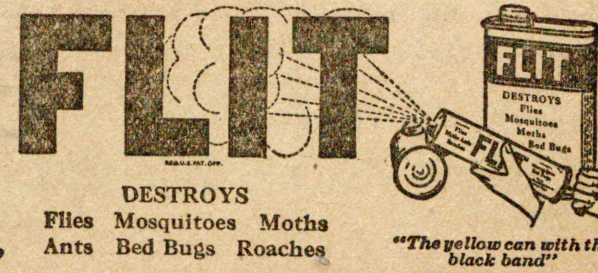

### Kills All Household Insects

Flit spray also destroys bed bugs, roaches and ants. It searches out the cracks and crevices where they hide and breed and destroys insects and their eggs. Spray Flit on your garments. Flit kills moths and their larvae which eat holes. Extensive tests showed that Flit spray did not stain the most delicate fabrics.

Flit is the result of exhaustive research by expert entomologists and chemists. It is harmless to mankind. Flit has replaced the old methods because it kills all the insects—and does it quickly.

Get a Flit can and sprayer today. For sale everywhere.

STANDARD OIL CO. (NEW JERSEY)

## ORLAND

Mr. Herman De Weese of Orland who has been ill for several months died in the Wabash hospital in Decatur, Illinois on Friday July 9th at 11 o'clock.

Funeral services were held on Monday afternoon from the Orland Methodist church with the Rev. Mr. Setterlund, officiating. The church was filled with sorrowing friends and relatives. The choir of the church rendered the music. Burial took place in the Cooper's cemetery where the Modern Woodmen rendered a beautiful service.

The deceased was born in Valparaiso, Indiana February 26th, 1883. He was united in marriage with Emma Henning on March 2, 1907 in Valparaiso. To this union three daughters were born, Verla, Edith and Ruth. For the past 20 years Mr. De Weese has lived in Orland and has been employed by the Wabash Railroad. He was a member of the Modern Woodmen and of the Orland Methodist Church.

## ORLAND M. E. CHURCH NOTES

Elmer L. Setterlund, Pastor  
Friday evening July 16th the moving picture is Miss Brewster's Millions.

Sunday July 18th: Bible School at 9:30 A.M. Morning worship at 10:30 A.M. This will be a combined commencement of the Daily Vacation Bible School of the Church and also a lecture by Dr. Jewell, Secretary of the Religious Education Council of the Chicago Baptist Association. Do not miss this opportunity.

Thursday July 22nd is "Chicago Southern District Day" at the Des Plaines Camp meeting. A party is planning to go from Orland for the day. All interested report either to Mr. Wm. Beagley or to the pastor. Trip will be made by automobiles.

Howard C. Junker who has been here visiting with his parents, Mr. and Mrs. Wm. Junker, has returned to Washington, D.C., where he is employed on the city fire department. His parents accompanied him and expect to spend a few weeks in Washington. Howard says he gets the News-Bulletin each week and is like a letter from home.

**FREE CLINIC AT JOLIET**  
Dr. John Mitchell will conduct a free clinic for crippled children and adults in the Public Health

Council rooms, Auditorium Bldg., Joliet, Illinois, on Wednesday, July 21st, from 8:30 to 12:00 A.M.

## TINLEY PARK

Wm. Rick who has been employed at the local yard of the Beatty Lumber Company has been promoted to the position of manager of Beatty Lumber Yard at Orland. His many friends wish him much success.

The property owners along what is known as Church Street are now planning to concrete this street for three blocks beginning from the main concrete road and running eastward. The street is to be 25 feet wide with curbing. A sewer system has already been laid. The cost of this improvement is to be paid by special assessment to be extended over a period of ten years.

The contract for building the new water main extension in Tinley Park has been awarded to a contractor from Monee. He has a regular ditching machine and will lay 5000 feet of mains, furnish the pipe, labor etc for \$8,083. He expects to have all material here in 30 days and expects to finish the job in a week. The mains will be extended in all four corners of the village and will give Tinley excellent fire protection.

The three night show, "The Trouble Chasers" given under the auspices of the Triangle Club at Saenger Hall last week was very well attended and on the closing night the hall was packed to utmost capacity.

The Club realized \$220 clear as their part of the proceeds and Mr. and Mrs. Frank G. King who put on the show also cleared a like amount.

Everyone was surprised at the talent in Tinley and all are enthusiastic over the play and the wonderful way in which Mrs. King directed it.

Another show is planned for late in the season.

Mr. and Mrs. Henry Wilke visited in Joliet Saturday.

Chicken thieves have been busy in this section. John Rick reports that he lost five chickens.

Wm. Holstein, local agent for the Green Garden Fire Insurance reports a big increase in business. He wrote 12 applications in one day this week. The company received 148 new applications during the past 3 months. The company is now

76 years old and is in a very flourishing condition. They paid out \$30,000 in settlements of claims for fire losses last year. Mr. Holstein says the wide range of policies of the company covering insurance for fire, hail, storm and even rain have been a big drawing card.

## OAK LAWN

**CONGREGATIONAL CHURCH**  
The daily Vacation Bible School has a registration of 50 children. There are two weeks left of the five, which have been proposed by the Federation of Churches of which the Congregational church is a member. A splendid spirit has been shown thru out and now every one is realizing that the end is coming altogether too soon.

The Junior class consisting of 22 boys and girls, is planning an outing for Friday afternoon. Miss Emily Reese who has given part of her vacation time to this group for the past three weeks, was presented by the class with a beautiful little Bible, an American translation by Edgar Goodspeed. Miss Reese is the principal of the Hubbard High school in Hubbard, Ind.

The Church Cabinet secured a gift from the Lanplant Lumber Co., of the blue prints of the new parsonage proposed for the church. The building committee consisting of Mr. O. Larsen as chairman, Mr. Luse and Mr. Exter are submitting these for bids.

Mr. Keith Winas has volunteered his expert services in supervising the construction of the foundation and will ask for volunteers in the wheelbarrow and shovel brigade.

The parsonage will greatly aid in handling the problem of the church school. The little beginners who have been forced to meet in the basement, will be assured of a nice warm room in the parsonage. This also will make room for another class in the church. Many churches have too much equipment, but this is not so with the Congregational church which has been handicapped because of the little plant at its service.

The Ladies Aid met at the home of Mrs. Shalers last week and are planning a card and bunco party at Mrs. Mann's and Miss Kennally's.

The Misses Brown from St. Louis are visiting at the home of Arthur Utt and family. Mr. and Mrs. Har- ry Preston and son have returned

## GOODRICH PUTS TIRE PRICES BACK TO LEVEL OF 1924

from their vacation spent in the Wisconsin lake district.

A generous reduction in tire prices just announced by The B.F. Goodrich Rubber Company has restored the price levels of two years ago, according to B.F. Rolfe, local Goodrich dealer at Worth, Ill.

"This is much more than a cut thrown out to attract a few backward tire buyers", says Mr. Rolfe.

"Comparison of the new price list with prices on the great majority of sizes and types in 1924 shows how completely any so-called 'inflation' has been squeezed out of tire prices. In a majority of cases, the new prices match the prices of two years ago."

Mr. Rolfe also points out that the new prices, figured in percentages, are 25 per cent or more below the peak prices of last year.

## MOKENA

**ST. JOHN EVANG. CHURCH**  
W.J. Cramer, Minister  
Sunday School 9:30 A.M. German service at 10:30 A.M.

## Helps Nervous Business Man

"Vinol certainly has helped me. I recommend it to anybody. I could not sleep or stand still a second, my nerves were so unstrung."—Howard Bugler, New York, N.Y.

Are you always tired, "all in," restless and irritable? Men and women are finding welcome relief in Vinol from nervousness and that fagged, all-gone feeling. A quarter century's use has proved the value of Vinol, the Cod Liver and Iron tonic without oil. You will love its pleasant taste.

H.C. Vogt, Druggist, Tinley.
